

## LETTER TO THE EDITOR. PRUE ACTON. 2ND JUNE

Liberal and National State governments want grazing, logging, mining, and development in National Parks.

I cannot remember anytime when there has been a more concerted move to roll back environment protection.

And what is weird is that once Liberals, including Fraser, Hill and Hamer, were such great advocates.

What is also weird, under Direct Action, Coalition spokesperson for Environment, Water and Climate Change, Greg Hunt will need every hectare of native vegetation intact to achieve the agreed target of 5% carbon emissions reduction .

Time is running out to prevent the States destroying wildlife habitat. Federal Environment Minister Burke must act now to list National Parks under the Environment Protection Conservation Act.
