

10 good reasons why we should stop native forest logging forever

- ① Unlogged forests store huge amounts of carbon
- ② Forests are our best defence against climate change
- ③ Unlogged natural forests are fire barriers
- ④ Logging natural forests is unprofitable
- ⑤ Native species lose their homes, foraging and breeding grounds
- ⑥ Sacred Aboriginal sites are often damaged by logging
- ⑦ Plantation timber can supply most timber & paper needs
- ⑧ About 90% of logged trees are exported as woodchips
- ⑨ Logged forests take 180 years to restore carbon & water
- ⑩ Forests are beautiful places of life and peace

What can we do about it?

Write to the Premier of NSW and the Prime Minister.
Ask them to stop logging our native forests – we need to let them stand protected forever.
