DON'T COOK-A-BURRA CARTOON COMPETITION

Ken Kookaburra is a new star on our South Coast radio stations. He is a cartoon figure who laughs at the claims made by native forest loggers that logging native forests really doesn't affect global warming because the trees regrow! If you listen to Ken Kookaburra with your parents at: www.dontmakemelaugh.com.au you will see that logging native forests is no laughing matter.

Ken thinks: "What are these guys trying to do : cook-a burra?"

Ken says: "Don't cook-a-burra"
