## COASTWATCHERS ANNUAL GENERAL MEETING

Saturday 17 October 2009 2pm at Tomakin Community Hall

Guest Speaker: Andrew Constance, local State Member

Biomass Burning as a form of renewable energy

Andrew Constance has agreed to tell the meeting about his study trip to Europe where he looked at biomass burning as a form of renewable energy. The proposed biomass electricity generator at the Eden woodchip mill is very controversial and we are strongly opposed to the use of wood from native forest for such purposes.

You are invited to come along and have your questions answered. We need a good rollup to help persuade the alternative government that this form of energy is not renewable.

Authorised by Jenny Edwards, Committee

Tomakin Hall is just off George Bass Drive (which runs from Batemans Bay to Moruya along the coast.) Turn off on the road (towards the ocean) which is close to the garage situated on George Bass Drive near the turn off to Mogo.
