

Bermagui Forest Tour

Forests NSW are again planning to log the forest right on the doorstep of Bermagui. This forest is home to many threatened and endangered species like the Koala, Swift Parrot and Yellow-bellied Glider.

Come on a guided tour of the area that was logged in 2008-09 and see that a forest is more than just trees to log. See the degradation that has occurred and then visit the area that is soon to be logged. Hear about real forest ecology, not the PR spin that you get from Forests NSW.

When: Saturday 25th June at 2pm

Where: Wills Rd, off Bermagui-Wallaga Lake Rd,
4km north of Bermagui.

Signs will direct you from Bermagui-Wallaga Lake Rd

What to bring: Sturdy shoes and an open mind
