

Letter to Sydney Morning Herald. 18.08.2017

Reference to Nick Roberts', CEO Forestry Corporation of NSW, single tree policy.

Which one tree was selected in this picture of recently logged Glenbog State Forest, south east NSW? (photo David Gallan).

We are losing beauty, carbon, culture, habitat, soil, water and wildlife from Forest Corp's. logging of the public's native forests. Taxpayers fund the economic losses from this destructive outdated practice. These Regional Forest Agreements are akin to exporting koala pelts and whaling. They must end.

Dr Bronte Somerset, Committee, SERCA.
